How to Learn from This Book

Front Matter, Chapter 2/12 — Revision & Viva-Prep Cheatsheet (English + Roman Urdu)
Source: agentfactory.panaversity.org/docs/how-to-learn-from-this-book

EN: Core idea: 'Foundation First. Practice Early. Depth on Demand.' Reading the whole reference front-to-back fails; skimming courses fails too. The book gives 5 layers, a 9-stage learning loop, and a 7-step per-course routine.
Roman Urdu: Core idea: 'Foundation First. Practice Early. Depth on Demand.' Poora reference front-to-back parhna galat hai; courses skim karna bhi galat hai. Book 5 layers + 9-stage loop + 7-step per-course routine deta hai.

1. The Five Layers

- **3 content layers (sthir, wait karti hain):** Introductions (ek baar order mein, ~2-3 ghante), Crash Courses (practice sequence mein, 'done' jab ship kar chuke ho), References (consult on-demand, kabhi 'done' nahi).
- **2 interactive layers (jawab dete hain):** Zia Tutor AI (one-to-one, kabhi 'done' nahi -- teacher hai), Social Annotation/Hypothesis (shared margin, many-to-many).

2. The Learning Loop + Introductions

- **9-stage loop** poori book par: Orient -> Learn -> Practice -> Recall -> Apply -> Unblock -> Discuss -> Verify -> Continue. Stage 5 (Apply) sabse zyada tootta hai -- missing-input problem jo 'Getting Paid as a Vertical FDE' supply karta hai.
- 10 orientation pages vocabulary install karte hain (Digital FTE, AI Worker, 10-80-10 Rule, FDE, vertical SoR) -- yaad nahi, sirf **pehchan** zaroori. Agar sirf 3 parhni hon: About, Thesis, Getting Paid as a Vertical FDE.

3. The Crash Courses -- 7-Step Routine

- Naqsha: Foundations -> General Agents -> Personal Agent Harnesses -> (Mode 1 ya Mode 2) -> References/Companions. Rule: ek waqt mein ek course; closing section = seekhne ki jagah.
- **7 Steps:** 1) Promise+questions parho, 2) Slides skim, 3) Pehli baar structure ke liye parho, 4) Closing work karo, 5) Quiz (page band karke), 6) Flashcards (spaced repetition), 7) Confusing passage annotate (90 sec).
- Honest self-grade: 3-sentence explain kar sakte ho? blank-screen dobara kar sakte ho? Quiz-galat 4 moves: wapis jao, galat samajh naam lo, apne alfaz mein explain karo, ek din baad retry.

4. References, Zia Tutor AI, Social Annotation

- **Just-in-time education:** concept usi waqt seekho jab useful ho -- par foundation ke bina galat sawal bhi confidently answer hoga.
- Zia Tutor AI: named teacher, connector-native, sessions/hafton mein yaad rakhta hai, book ke apne content se parhta hai. **Augmentation, replacement nahi.**
- Hypothesis annotation: har page mein margin, highlight/comment/reply. **5 types:** Clarify, Connect, Question, Apply, Correct. Teachers: private group students ko zyada honest banata hai.

5. Putting It Into Practice

- **3 time plans:** Weekend (~8 ghante), Month of evenings (15-20 ghante, pehla Digital FTE ship), Cohort (ek term).
- **Exit Check (5 boxes):** Digital FTE define kar sakta hoon, project ship kiya, reference real-kaam-se khola, Zia se sharam-wala sawal poocha, agle-reader-ki-madad-wali annotation chhodi.
- **Start Here:** Thesis parho -> Crash Courses kholo (What AI Actually Is se) -> Zia Tutor connector add karo -> margin sidebar kholo.

Key Terms Cheatsheet

One line each — English + Roman Urdu.

Term	English	Roman Urdu
Foundation First, Depth on Demand	Learn enough to start; go deeper only when real work demands it.	Itna seekho ke shuru kar sako; depth tab jab kaam demand kare.
9-stage Learning Loop	Orient, Learn, Practice, Recall, Apply, Unblock, Discuss, Verify, Continue.	Poori book par chalne wala 9-stage cycle.
7-Step Course Routine	Promise -> Slides -> Read -> Closing work -> Quiz -> Flashcards -> Annotate.	Har Crash Course ke andar chalne wala routine.
Just-in-time education	Learning a concept exactly when it becomes useful, not in fixed sequence.	Concept usi waqt seekhna jab zaroorat ho, fixed sequence nahi.
Social Annotation (Hypothesis)	A shared margin on each page for highlights, questions, replies.	Har page ka shared margin -- highlight/sawal/reply ke liye.
Exit Check	5 checkboxes, one per layer, confirming the whole system was used.	5 checkboxes, har layer ke liye, poora system use hua ya nahi confirm karte hain.

Quick Self-Check

Question	Answer
What's the book's core learning philosophy?	Foundation First. Practice Early. Depth on Demand -- not front-to-back reading, not skimming.
Which stage of the 9-stage loop breaks most often, and why?	Apply -- students have coursework but no job, employed devs have a job but no coursework time; it's a missing-input problem.
What are the 3 'if you only read 3' Introductions?	About, Thesis, and Getting Paid as a Vertical FDE -- Thesis is the most-skipped and most expensive skip.
How should References (glossary, cheatsheets) be used?	Consult on-demand, never front-to-back -- just-in-time, but foundation-free use still risks confidently wrong answers.
Is Zia Tutor AI meant to replace a human teacher?	No -- it's explicitly augmentation, not replacement; it works alongside a teacher.
What are the 5 annotation types in Social Annotation?	Clarify, Connect, Question, Apply, Correct -- an honest question is rated the most valuable kind.
What's the 4-move fix when a quiz answer is wrong?	Go back to the section, name the misunderstanding, explain it in your own words, retry a day later.

Where This Leads / Sources

Leads to: every Crash Course chapter (via the 7-step routine), Glossary/Cheatsheets (References layer), Zia Tutor AI chapter.
