Just Delegate It: A Crash Course

Foundations (Everyone), Chapter 1/10 — Revision & Viva-Prep Cheatsheet (English + Roman Urdu)
Source: agentfactory.panaversity.org/docs/just-delegate-it-crash-course

EN: Move from asking AI to delegating to it, through a 6-step Delegation Loop: define, delegate, observe, intervene, verify, accept. Rule: need-first, then tool.
Roman Urdu: AI se asking se delegating ki taraf move karo, 6-step Delegation Loop se: define, delegate, observe, intervene, verify, accept. Rule: pehle need, phir tool.

1. Asking vs Delegating

- Asking = ek sawal, ek jawab. Delegating = outcome diya jata hai, clicks nahi -- AI khud steps choose karta hai.
- **6-line Delegation Brief:** outcome, context, constraints, authority, deliverable, verification.

2. Research + Deliverable

- Research: search vs remember, aur **citation != verification** -- source quote karna proof nahi hai ke sahi hai.
- Give AI a source: quote it, stay inside it. Deliverable, not just an answer -- caveats easily get lost, so count them explicitly.

3. Authority + Projects + Intervene

- Plan-first authority: the cheapest moment to fix a plan is before execution, not after.
- Repetition -> Projects (standing knowledge + instructions, so you don't re-brief every time).
- **6 intervene moves:** Stop, Correct, Redirect, Change, Escalate, Take-back.

4. Verify + Accept

- **Verify sequence:** Identify -> Trace -> Challenge -> Decide -> Accept/Correct/Investigate/Reject.
- **4 review thresholds:** stakes, reversibility, audience, regulatory status. 4 things that never ship unreviewed.

Key Terms Cheatsheet

One line each — English + Roman Urdu.

Term	English	Roman Urdu
Delegation Loop	Define, delegate, observe, intervene, verify, accept.	Define, delegate, observe, intervene, verify, accept.
Delegation Brief	6 lines: outcome, context, constraints, authority, deliverable, verification.	6 lines: outcome, context, constraints, authority, deliverable, verification.
Citation != Verification	Quoting a source isn't proof the claim is correct.	Source quote karna is baat ka proof nahi ke claim sahi hai.
6-step delegation ladder	Prompt -> Collaboration -> Delegated job -> Workflow -> AI Worker -> Agent Factory.	Prompt -> Collaboration -> Delegated job -> Workflow -> AI Worker -> Agent Factory.

Quick Self-Check

Question	Answer
What's the key difference between asking and delegating?	Asking is one question/one answer; delegating hands over an outcome and lets AI choose the steps.
What are the 6 lines of a Delegation Brief?	Outcome, context, constraints, authority, deliverable, verification.
Why is plan-first authority cheaper than reviewing after execution?	Fixing a plan before it runs is always cheaper than fixing the output it already produced.
What are the 6 intervene moves?	Stop, Correct, Redirect, Change, Escalate, Take-back.

Where This Leads / Sources

Leads to: General Agents courses (brief grows with sources/destination/stop-rule), Designing the Vertical System of Record (full outcome contract). Full 12-Q quiz in 07-test-your-understanding.md.
